

Medical & Forensic Evidence Summary

Primary source: Supreme Court of India, Criminal Appeal No. 142 of 2015, Tomaso Bruno & Anr. v. State of U.P., judgment dated 20 January 2015. The case facts and court findings below are summaries of that judgment, not original police/court documents.

Post-mortem record

- First post-mortem: 5 February 2010, conducted by Dr. R.K. Singh (PW-10), with Ex. Ka-10.
- Second post-mortem: 6 February 2010, conducted by a panel headed by Dr. A.K. Pradhan (PW-11), with Ex. Ka-11.
- The reports stated a cause of death of asphyxia attributed to strangulation.

Issues discussed by the Supreme Court

- The Court noted that several expected signs associated with strangulation were not present.
- The Court also noted that no alleged hard/blunt object said to have caused strangulation was recovered from the room.
- The Court considered the medical evidence together with the other evidence rather than treating the expert opinion as automatically conclusive.

Prototype note

- This is a legal-evidence summary, not a forensic laboratory report. Do not label it as an original autopsy report or reproduce sensitive forensic imagery.

Prepared for prototype demonstration. Verify against the primary judgment before using in any legal or academic context.
